Re: Improved Filter - Helf.# 582-339

Dear Mr. Helferich:

Dr. Seligman and Mr. Toepffer have looked over the response that you propose to make to the Patent Office Action in this case. The only comment is directed toward page 3, lines 9 and 10, "The additional materials". They think that this is a bit ambiguous because we are talking about the additional materials used for the adhesive and not for the additional materials which are removed by the smoke.

We feel that this is a very minor point and that, in general, Mr. Kothe has presented the arguments very well.

Sincerely yours,

TCH

(Mrs.) Thelma C. Heatwole
Patent Liaison Officer
